

Database Architect/Administrator
Lijit Networks, Inc.

Lijit Networks, Inc. has an immediate need for a Database Architect/Administrator. As a member of the core engineering team, you will be responsible for database design, implementation and maintenance for an exciting new Internet service. In addition to strong technical skills, the successful candidate should be an eager, team oriented, self starter with a good attitude, interested in working in a small fast paced startup.

The general responsibilities for this position include:

- Oversee the design and implementation of the database software and hardware architecture to build a highly scalable database platform capable of handling rapid growth for a high volume internet service.
- Interact with Product Management and application developers to define and implement database specific requirements to support new features.
- Enhance existing internal and external reporting functions to provide important business and user metrics.
- Perform routine database administration tasks such as table maintenance, backup/recovery, performance monitoring, software upgrades, etc.

The ideal candidate will have the following qualifications:

- Extensive experience in relational database design/administration (e.g. 7-10 years).
- 2+ years recent design/administration experience with MySQL in a large, high volume production environment.
- Extensive experience in all aspects of MySQL database optimization (including query analysis and optimization, stored procedures, MySQL configuration tuning, and database server and hardware optimization).
- Hands on experience setting up and managing database hardware, storage, networks and replication/backup.
- Experience defining extremely scalable database architecture for a high volume internet site.
- Comfortable working closely with a small team of software developers.
- Significant experience with other high volume databases such as Oracle/SQL Server.
- MS/BS Degree in Computer Science or closely related field

Please send your resume to jobs@lijit.com, with "DBA" in the subject line.
