

Web Developer
Lijit Networks, Inc.

Lijit Networks, Inc. has an immediate need for a Web Developer. As a member of the core engineering team, you will be responsible for designing and developing new features for an exciting new Internet service. In addition to strong technical skills, the successful candidate should be an eager, team oriented, self starter with a positive attitude, interested in working in a small fast paced startup.

The general responsibilities for this position include:

- Interact with Product Management and application developers to define and implement the back-end logic to support new features for a web-based application.
- Create unit tests for software validation
- Create and maintain software design and implementation documents as appropriate.

The ideal candidate will have the following qualifications:

- 5 + years experience in web programming in a high volume internet environment.
- 3+ years advanced experience PHP in a LAMP environment
- Extensive experience working within a software development organization utilizing source code management, defect tracking, and IDE development tools.
- Comfortable working closely with a small team of software developers.
- Linux experience a plus.
- MS/BS Degree in Computer Science or closely related field

Please send your resume to jobs@lijit.com, with “Web Developer” in the subject line.
