

UI Web Developer Lijit Networks, Inc.

Lijit Networks, Inc. has an immediate need for a UI Web Developer. As a member of the core engineering team, you will be responsible for designing and developing user interfaces for an exciting new Internet service. In addition to strong technical skills, the successful candidate should be an eager, team oriented, self starter with a positive attitude, interested in working in a small fast paced startup.

The general responsibilities for this position include:

- Interact with Product Management and application developers to define and implement the UI and associated back-end logic to support new features for a web-based application.
- Implement and test client-side UI's across a variety of browsers and platforms.
- Create and maintain software design and implementation documents as appropriate.

The ideal candidate will have the following qualifications:

- 5 + years experience in web programming in a high volume internet environment.
- 3+ years advanced experience in CSS, HTML/XHTML, DOM, PHP, JavaScript, SQL.
- Demonstrated expertise and a passion for UI design and development.
- Extensive experience with AJAX (prototype library a plus).
- Experience supporting web based UI's across multiple browser and OS platforms (e.g. Firefox, IE, Safari on both Windows and Mac).
- Extensive experience working within a software development organization utilizing source code management, defect tracking, and IDE development tools.
- Comfortable working closely with a small team of software developers.
- Experience with Flash scripting a plus.
- Linux experience a plus.
- MS/BS Degree in Computer Science or closely related field
